COURSE DESCRIPTIONS 2020-2021

NATIVITY OF THE BLESSED VIRGIN MARY HIGH SCHOOL

Member of the Middle States Association of Colleges and Secondary Schools

ONE LAWTONS HILL, POTTSVILLE PA 17901

PHONE: (570) 622 - 8110

FAX: (570) 622 - 0454

Dear Students,

The booklet that you are receiving contains information about the courses that are available to you for the 2020-2021 Academic Year.

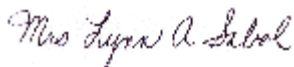

Please discuss these offerings with your parents, teachers, Studies Office and the Guidance Department so that you make intelligent decisions concerning the courses that you will study next year. Once your decision is made, have your teachers sign your course selection form, if a signature is necessary, and then have your parents sign the **COMPLETED FORM**. Please list alternate electives in case there would be a schedule conflict and you would not be able to get scheduled for your first choice. It is also possible that an elective course may have to be dropped if an insufficient number of students choose to take the course or if it is not possible to schedule a teacher for it. **All students must have six (6) major courses scheduled each semester.**

All course selection papers must be returned to your home room teacher **on or before March 9th** Therefore, make certain that you get the needed teachers' signatures before that date. Also, be sure to put your own signature on the form before you hand it in. Because of the cost of processing students' schedules, there is a Course Selection Fee of \$50.00 per student. This fee **must be paid as you hand in your Course Selection Form**. Once your course selection paper is handed in, we must consider your decision as final so that classes and teachers can be scheduled to meet the needs of all the students. Any requests for changes initiated by students or parents after that date must be accompanied by a written letter from one of your parents explaining the reason for the change. Once the schedules are issued at the beginning of the next school year, **no course may be dropped/changed**.

Any student who does not have his or her course selection paper completed and handed in by March 13th will be handled as a new student and will be charged a fee of \$75.00. This is necessary because of the increased clerical work involved in processing late requests.

Please choose your courses carefully so that you make the best possible decisions in keeping with your goals and academic abilities. If you are choosing a course that has certain pre-requisites, make certain that you have those pre-requisites. If you have any questions, please feel free to contact me or the Studies Coordinator or the Guidance Department as soon as possible.

Sincerely,

Mrs. Lynn Sabol
Principal

ACADEMIC PROGRAM

The academic program at Nativity of the Blessed Virgin Mary High School conforms to the recommendations of the State Department of Public Education and the regulations of the Allentown Diocese. Courses are offered in such a way that all students may choose those subjects which will enable them to prepare for the vocation they wish to follow. Course selections and pre-registration are made after the first semester reports are issued.

Course description booklets are distributed in the second semester. Courses are added or deleted according to students' needs and the school's ability to meet these needs. The Guidance Department, the teachers, the Department Chairpersons and the members of the Administration offer help in the selection of courses. Each Department has the right to set up pre-requisites for the courses in that Department.

REQUIREMENTS FOR GRADUATION

The following are above the minimum requirements set down by the Pennsylvania Department of Education and the Diocese of Allentown for the graduation of student from Nativity B.V.M. High School.

Twenty-seven and one-quarter credits (27.25) are required for Graduation:

- 4 credits in Theology
- 4 credits in English
- 3 credits in Social Studies (Amer. Cultures, World Cultures,
American Government/Consumer Economics)
- 3 credits in Mathematics
- 3 credits in Science
- 7 credits in Electives
- 3.25 credits in other required minors

** N.B. Any change in the requirements must have the approval of the Principal.

COURSE REQUIREMENTS

All students are required to have six (6) major courses each semester. Minor courses include: Physical Education, Health 1, Health 2, First Aid, Intro to Word Processing, Intro to Excel, Freshmen Seminar, Music Appreciation, SAT Preparation and Public Speaking.

Required Courses for all Freshmen

Theology	American Cultures	Physical Science
English	Algebra 2 or Algebra 1	Health 1
Physical Education	Intro to Word Processing	Freshman Seminar

Elective Courses for Freshmen

Spanish 1	French 1
-----------	----------

Freshmen whose eighth grade marks and Standardized Testing Scores indicate average verbal ability elect to begin one of the language programs. Students who elect a language are expected to complete two years of the language.

Required Courses for all Sophomores

Theology	World Cultures	Biology	Physical Education
English	Music Appreciation	Geometry or Advanced Algebra/Trigonometry	
SAT Preparation	Introduction to Microsoft Excel		

Elective Courses for Sophomores

French 1, 2	Spanish 1, 2
-------------	--------------

Required Courses for all Juniors

Theology	American Government	Consumer Economics
English	A Mathematics Course	Chemistry
Physical Education	Health/First Aid	Public Speaking

Required Courses for all Seniors

Theology	English	Physical Education
----------	---------	--------------------

Elective Courses for all Juniors and Seniors

COURSE DESCRIPTIONS

THE REVELATION OF JESUS CHRIST IN SCRIPTURE

GRADE 9

The purpose of this course is to give students a general knowledge and appreciation of the Sacred Scriptures. Through their studies of the Bible they will come to encounter the living Word of God, Jesus Christ. In the course they will learn about the Bible, authored by God through Inspiration, and its value to people throughout the world. If they have not been taught this earlier, they will learn how to read the Bible and will become familiar with the major sections of the Bible and the books included in each section.

CHRISTOLOGY: WHO IS JESUS CHRIST?

GRADE 9

The purpose of this course is to introduce students to the mysteries of Jesus Christ, the Living Word of God, the Second Person of the Blessed Trinity. In this course, students will understand that Jesus Christ is the ultimate Revelation to us from God. In learning about who He is, the student will also learn who He calls us to be. Students will pay particular attention to the Gospels, where they may grow to know and love Jesus Christ more personally.

THE MISSION OF JESUS CHRIST: THE PASCHAL MYSTERY

GRADE 10

The purpose of this course is to help students understand all that God has done for us through his Son, Jesus Christ. Through this course of study, students will learn that for all eternity, God has planned for us to share eternal happiness with Him, which is accomplished through the redemption Christ won for us on the Cross. Students will learn that they share in this redemption only in and through Jesus Christ. They will also be introduced to know what it means to be a disciple of Christ and what life as a disciple entails.

ECCLESIOLOGY: THE MISSION OF JESUS CONTINUES IN THE CHURCH

GRADE 10

The purpose of this course is to help the students understand that in and through the Church they encounter the living Jesus Christ. They will be introduced to the fact that the Church was founded by Christ through the Apostles and is sustained by Him through the Holy Spirit. The students will come to know that the Church is the living Body of Christ today. The Body has both divine and human elements. In this course, students will learn not so much about events in the life of the Church but about the sacred nature of the Church.

SACRAMENTS AS PRIVILEGED ENCOUNTERS WITH JESUS CHRIST

GRADE 11

The purpose of this course is to help students understand that they can encounter Christ today in a full and real way in and through the sacraments, and especially through the Eucharist. Students will examine each of the sacraments in detail so as to learn how they may encounter Christ through life.

LIFE IN JESUS CHRIST: CHRISTIAN MORALITY

GRADE 11

The purpose of this course is to help students understand that it is only through Christ that they can fully live out God's plans for their lives. Students are to learn the moral concepts and precepts that govern the lives of Christ's disciples especially through the Ten Commandments.

APOLOGETICS

GRADE 12

This branch of Theology is devoted to the knowledge and defense of God and Catholicism. This course is an overview of the Catholic faith built upon concepts that have been studied in the previous year. It builds upon a solid foundation in the truths of the Catholic faith using reason and knowledge of truth as revealed by God. An in-depth study of the Apostles' Creed is offered to prepare students to defend and to apply these truths in their daily lives. Using Sacred Scripture, the Catechism of the Catholic Church, relevant Church documents and paying close attention to the Magisterium of the Church, students will be more prepared to offer proper evidence of what they have learned and how they can share their faith in the modern world.

CHRISTIAN VOCATIONS

GRADE 12

Based upon the universal call of God to holiness, students will come to realize that God has a plan for their life. By understanding this call, students are led to discern how they are being called to the single life, the married life, the consecrated life or Holy Orders. The responsibilities and privileges of each state of life are presented. This course includes opportunities for students to know themselves more fully, the importance of forming interpersonal relationships, the purpose of dating, effective communication skills, Christian values that govern actions and ways to make vocational and career choices in light of these values. This course also leads students to embrace their spirituality as the foundation for their personal happiness. Pope Saint John Paul II's "Theology of the Body" with its focus on what it means to be human and the purpose of our existence as discovered and revealed through our bodies will be introduced.

ADVANCED THEOLOGY 3 AND 4

GRADES 11 & 12

Advanced Sacraments
Advanced Apologetics

Advance Christian Morality
Advanced Christian Vocations

The topics covered are essentially the same as in Junior and Senior years respectively but in greater depth and with greater personal reflection along with the study of certain documents of the Second Vatican Council.

Pre-requisite: a grade of 93 or above in the previous year's theological discipline and the signature of the Theology Department Chairperson.

INTRODUCTION TO ECCLESIASTICAL LATIN

GRADES 11 & 12

The purpose of this course is to give students a mastery primarily of academic vocabulary. A mastery of Latin enables the student to more easily understand the more technical academic vocabulary of both the sciences and the humanities. Students will also be introduced to the grammatical techniques used with both nouns and verbs and be able to use them in their proper context. The critical thinking skills of students will be put to the test through the analysis and synthesis of various passages from Scripture with the use of vocabulary and grammar they learn throughout the semester.

ENGLISH

<u>NUMBER</u>	<u>COURSE NAME</u>	<u>LEVEL</u>	<u>CREDITS</u>	<u>GRADE</u>

ELECTIVES

154	AP Language and Composition	4	1	11-12
155	AP Literature and Composition	4	1	11-12
165	Creative Writing	2	.5	11-12
170	Communication	2	1	9-12
180	Independent Vo-Tech English	2	.5	10-12
175	Journalism and Mass Media	2	.5	11-12

COURSE DESCRIPTIONS

The goal of the English courses is to prepare students for college. The English courses are also geared toward preparing students for business careers. The Level 2 courses offer all of the required literature, composition, vocabulary, correct usage, and grammar skills required for students of a given grade level. The Level 3 courses include additional material above and beyond that which is required.

FRESHMEN SEMINAR/RESEARCH WRITING

GRADE 9

This course is designed to help freshmen adjust to high school. They will strengthen their organizational skills, time management, study habits, social skills and MLA style in context of writing a research paper. Also, students will begin to explore and consider careers and further education.

SAT PREP ENGLISH SECTION

GRADE 10

A 4.5 week course designed to prepare students for the English section of the SAT Test. Topics will include: Vocabulary, Paragraph Analysis, Reading Comprehension and test taking skills

ADVANCED ENGLISH 1

GRADE 9

Advanced English I is an in-depth study of various genres of literature. This course introduces students to higher level content and helps them transition into high school academic life. Students will work on short stories, poetry, Shakespeare, and vocabulary units. The advanced level class will also be responsible for larger texts including a novel and/or a play in its entirety. Students will begin to incorporate interpretation into formal writing in the form of expository, descriptive, and persuasive essays in MLA style. Grammar instruction is also included.

ENGLISH 1

GRADE 9

English I is an introduction to various genres of literature. This course introduces students to high school literature in addition to helping them transition into high school academic life. Students will work on short stories, poetry, Shakespeare, and vocabulary units, and begin to incorporate interpretation into formal writing in the form of expository, descriptive, and persuasive essays in MLA style. Grammar instruction is also included.

ADVANCED AMERICAN LITERATURE

GRADE 10

This course emphasizes the close reading of complex texts, valuing evidence, and attention to language. Students will understand how writers and speakers use specific words and sentences to move the thoughts, emotions, and action of readers and listeners. It will also train students as writers who are able to craft complex sentences as the foundation for writing in order to facilitate complex thinking and to communicate ideas clearly. Grammar instruction and vocabulary development are an integral part of the objectives of this course. This course is highly recommended for students planning to take AP Literature and Composition and/or AP Language and Composition.

Pre-requisite: Approval of Department Chairperson.

AMERICAN LITERATURE

GRADE 10

This course is an in-depth study of American Literature focusing primarily on modern formal and informal genres, as well as imaginative texts. Writing instruction focuses on analytical, narrative and compare and contrast formats in MLA Style. Grammar instruction and vocabulary development are also included in this course.

ADVANCED BRITISH LITERATURE

GRADE 11

This course is an in-depth study of the major works of British Literature starting with the earliest written poetry through the Middle Ages and Renaissance to modern authors. Throughout the course, students will gain an understanding of the historical eras that have impacted the English language and literature. Writing instruction will focus on personal, analysis, critique, and research formats in MLA style. Grammar and vocabulary instruction is also included.

Pre-requisite: Approval of Department Chairperson.

BRITISH LITERATURE

GRADE 11

This course is a study of the major works of British Literature starting with the earliest written poetry through the Middle Ages and Renaissance to modern authors. Throughout the course, students will gain an understanding of the historical eras that have impacted the English language and literature. Writing instruction will focus on personal, analysis, critique, and research formats in MLA style. Grammar and vocabulary instruction is also included.

ADVANCED PLACEMENT LANGUAGE AND COMPOSITION

GRADE 11-12

The AP English Language and Composition course cultivates the reading and writing skills that students need for college success and intellectually responsible civic engagement. The course cultivates the rhetorical understanding and use of written language by interacting with the reading and writing of formal and informal genres (e.g., memos, letters, advertisements, political satires, personal narratives, scientific arguments, critical critiques, and research reports). (Adapted from the AP College Board Course Description for AP Language and Composition, 2014) Students should be prepared to read outside of class and come to class ready to discuss the selections.

Pre-requisite: Approval of Department Chairperson.

Please Note: Students enrolled in AP classes are required to take the AP test in the spring.

ADVANCED WORLD LITERATURE

GRADE 12

Students will read various authors from around the world and become accustomed to other cultures as they read. In addition to many short stories, major works that will be studied include: *Hamlet*, *Oedipus*, and excerpts from Dante's *Inferno*. Texts are studied thematically which encourages in-depth analysis and synthesis between texts as expressed through discussion and written work. Writing instruction will focus on argument, analysis, critique, and compare and contrast formats in MLA style. Grammar and vocabulary will also be covered.

Pre-requisite: Approval of Department Chairperson.

WORLD LITERATURE

GRADE 12

This course is designed to acquaint students with various authors from around the world. Units are comprised of literature from regions including the Mediterranean, Continental Europe, Africa, Asia and the South Pacific and South and Central America. Major works studied include *Hamlet* and Dante's *Inferno*. Writing instruction will focus on argument, analysis, critique, and compare and contrast formats in MLA style. Grammar and vocabulary instruction will also be covered.

AP LITERATURE AND COMPOSITION

GRADES 11-12

The AP English and Literature course engages students in the critical reading and critical analysis of imaginative literature. Through the close reading of selected texts, students deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students consider a work's structure, style and themes, as well as such smaller scale elements as use of figurative language, imagery, symbolism and tone. (Adapted from the AP College Board Course Description for AP Literature and Composition, 2014) Students should be prepared to read outside of class and come to class ready to discuss the selections.

Pre-requisite: Approval of Department Chairperson.

Please Note: Students enrolled in AP classes are required to take the AP test in the spring.

CREATIVE WRITING

GRADES 11-12

This semester-long class is designed to balance freedom and structure in order to enrich student's creativity and improve their writing. They will write using various forms and techniques. Projects include different kinds of short stories, character sketches, and a small poetry portfolio. Students will also keep a journal and participate in group workshops.

PUBLIC SPEAKING

GRADES 11-12

This course is designed to provide the student with the basic techniques of effective public speaking. Students will learn how to prepare different types of speeches (formal and informal), how to prepare an effective presentation through research and use of visual aids, and learn to develop listening skills. Constructive criticism from the teacher and students will lead to the speaker's self-improvement and self-confidence in public speaking.

COMMUNICATIONS

GRADES 9-12

This course was developed to give international students an opportunity to increase their proficiency in the daily use of the English language. Through the four basic components of language learning: listening, speaking, reading and writing, students are exposed to a wide variety of topics. In addition, students learn about the customs of our school, community and country.

INDEPENDENT VO-TECH ENGLISH

GRADES 10-12

This course is offered to students who have chosen to attend vo-tech to pursue a technical trade. It shows how words are used in specific areas and examines the language of mass media, television, and technical trades.

JOURNALISM AND MASS MEDIA

GRADES 11-12

This course will cover the fundamentals of school newspaper production such as news writing, creative writing, editing, layout, photojournalism and the legal rights and responsibilities of the student press. Students will be instructed in the use of current software programs to create the *SKYLINES* and other school publications. Each student will develop a personal portfolio of projects.

SOCIAL STUDIES

<u>NUMBER</u>	<u>COURSE NAME</u>	<u>LEVEL</u>	<u>CREDITS</u>	<u>GRADE</u>
212	American Cultures	2	1	9

COURSE DESCRIPTIONS

AMERICAN CULTURES (1865 - Present)

GRADE 9

The American Cultures course offers students a chronological survey of topics ranging from the post Civil War (1865) to the present. The role Schuylkill Countians and/or other Pennsylvanians played during this historical time period is a part of class presentations. Incorporated into the course are geography skills units.

WORLD CULTURES

GRADE 10

This course will provide the student with a comprehensive overview of the development of world civilization. The course will begin with an exploration of the ancient evidence of man's evolution and the conditions that led to the development of ancient societies. Finally, we will focus on the development of kingdoms, empires and modern nations and various struggles faced by these societies throughout history. In particular, emphasis will be placed on the history, culture and religions of the Middle East and Europe.

AMERICAN GOVERNMENT

GRADE 11

This course will present an overview of the Constitution and the various duties and powers granted to each of the three branches of the federal government. If time permits, the students also study such topics as the Electoral College, Bureaucracy and Congressional Committees.

CONSUMER ECONOMICS

GRADE 11

This course will provide an overview of the different economic systems from throughout the world as well as the basic principles of the Market Economy. The students will also become familiar with consumer behavior in the free market, as well as their rights and responsibilities as consumers.

SOCIOLOGY

GRADE 12

As one of the social sciences, sociology takes its place beside history, geography, anthropology, political science, economics and psychology. Sociology is devoted to the study of human groups. More simply, it may be called the science of society.

PSYCHOLOGY

GRADE 12

Psychology is the social science concerned with the study of human behavior. This course covers the following topics: Basic Introduction to Psychology as a Science, Learning and Memory, Personality Theory, and Abnormal Psychology.

ADVANCED PLACEMENT UNITED STATES HISTORY

GRADES 11-12

This course is offered to able, highly motivated juniors and seniors. It is a full year course and is comparable to a college introductory survey-seminar course. The history of the United States will be studied (Colonial to Present) with attention being given to the political, diplomatic, economic, social, and intellectual developments of the period. Students will have the opportunity to take the AP exam in the spring by which they may obtain college credit for their work.

Pre-requisite: Approval of Department Chairperson.

Please Note: Students enrolled in AP classes are required to take the AP test in the spring.

POLITICAL GEOGRAPHY

GRADES 11-12

This course provides the student with an introduction to the basic concepts of geographic study such as the five themes of geography. In addition, there will be an emphasis on the similarities and differences of the major world regions in terms of historical, political, economic and social development.

CURRENT EVENTS

GRADES 11-12

This course is designed for the student who wants to become more aware of the world in which we live. Students will gain a greater understanding of the world by examining the major issues of today through the use of the media (printed and electronic). Class size is limited to 16 students.

PENNSYLVANIA HISTORY

GRADES 11-12

This course is an overall survey of the historical development of the State of Pennsylvania from its foundation to the present day. The topics to be studied will include: the arrival of the colonists, the first settlements, westward expansion and Indian conflicts, the crucial role of the State in the French and Indian War as well as the Revolutionary War. The course will also focus on the impact of the industrialization and labor movements in the state during the late 19th and early 20th centuries. Finally, there will be a brief overview of recent historical events.

20th CENTURY AMERICAN HISTORY

GRADES 11-12

This course will take an intensive investigation of American History from the Spanish-American war until the Gulf wars. The course will examine not only factors in America but also the forces from other countries that led to the World Wars, the Cold War, the collapse of the Soviet Union and the current Middle East crisis. Some of the topics to be covered will be the Spanish American War, the World Wars, the Great Depression and the New Deal, the emergence of sports and its effect on American culture, the Cold War, the Vietnam era, Nixon and Watergate, a critical look at the development of the Mid-East.

HISTORY OF SPORTS

GRADES 11-12

This course will examine the development of sport(s) in America. We will focus on the students gaining a better understanding of the inner relationship that sport has on social, economic, cultural and political forces. We will examine the historical context as well as significance of gender, race, ethnicity and social class. We will do historical investigation through readings, primary sources, audio and visual materials as well as class discussions.

FLOW CHART FOR MATH COURSES

COURSE DESCRIPTIONS

(NOTE - The Math Department offers a test for all 8th graders.. Arrangements to take the test should be made with the Studies Office during late Spring of the 8th grade.)

NOTE: All advanced level Math classes and all Juniors and Seniors enrolled in Math classes are required to have a graphing calculator. We recommend the TI-84 or TI- 84 plus. Students who purchase other calculators must be able to operate them. Calculators will not be supplied.

SAT PREP MATH SECTION

GRADE 10

A 4.5 week course designed to prepare students for the mathematics section of the SAT. Topics will include: Algebra, Geometry and test taking strategies.

ALGEBRA 1

GRADE 9

This course is offered to students who need more time and practice with various concepts. It is the foundation for further study in mathematics development through examination of the real number system. Basic concepts in solving equations and inequalities, polynomials, factoring, and graphing are among the topics introduced.

Pre-requisite: Students will be placed in Algebra 1 by the Mathematics Department with the recommendation of the eighth grade teacher.

ALGEBRA 2

GRADE 9

The foundation for the further study of mathematics is developed through an examination of the real number system. A review of solving techniques for equations and inequalities, along with the following will be discussed: exponents, polynomials, factoring, linear equations, systems of equations and inequalities and radicals.

Pre-requisite: Students will be placed in Algebra 2 by the Mathematics Department with the recommendation of the eighth grade teacher.

ADVANCED ALGEBRA 2

GRADE 9

This course is intended for those who have high ability in mathematics. A complete in-depth study of Algebra is done. Topics include polynomials, factoring, linear equations and inequalities, quadratic equations, rational expressions, graphing of linear functions and polynomial functions, and radicals. Considerable time is devoted to problem solving techniques and word problems.

Pre-requisite: Students will be placed in Advanced Algebra 2 by the Mathematics Department with the recommendation of the eighth grade teacher.

ADVANCED GEOMETRY**GRADE 10**

This course is an intensive study of aspects of plane and solid geometry. Principles of geometry are covered with an emphasis on deductive reasoning and the development of thinking skills. The structure of proofs is also emphasized.

Pre-requisite: Advanced Algebra 2 and/or approval of Department Chairperson.

GEOMETRY**GRADE 10**

This course attempts to recognize and develop an understanding of Geometric concepts and principles. Reasoning and thinking skills are developed, to be used in further applications of math.

GENERAL GEOMETRY**GRADES 10-11**

This course is for students who have completed Algebra 2 OR Algebra 1. The course is designed to cover the basic vocabulary, figures, and concepts of Geometry.

ADVANCED ALGEBRA 3/TRIGONOMETRY**GRADE 9-10**

This course is to be taken by freshmen or sophomores entering the Advanced Placement Program. It can be taken concurrently with Advanced Geometry. It can be taken concurrently with Advanced Geometry. In this course, emphasis is placed on an in-depth understanding of the structure of algebra including the Cartesian coordinate plane and the use of the graphing calculator. Topics include linear and quadratic equations and inequalities, systems of equations, functions, matrices, polynomial equations and functions, radicals, complex numbers and rational expressions and equations. Course content will also include topics in trigonometry such as right triangle relationships and applications, degree and radian measure, trigonometric identities, graphs of the functions, use of the unit circle and Laws of Sines and Cosines with oblique triangles.

Pre-requisite: Approval of Department Chairperson.

ADVANCED ALGEBRA 3**GRADE 11**

In this course emphasis is placed on an in-depth understanding of the structure of Algebra including the Cartesian coordinate plane and the use of the graphing calculator. Topics include linear and quadratic equations and inequalities, functions, systems of equations, graphs, matrices, polynomial equations and functions, radicals, rational expressions and equations and complex numbers.

Pre-requisite: Advanced Geometry and/or approval of Department Chairperson.

ALGEBRA 3**GRADES 11-12**

This course begins with a general review of algebra topics that include: equations, inequalities, polynomials and factoring, linear equations and systems of equations and inequalities. Problem solving techniques are emphasized and refined as higher mathematical concepts are introduced. The complex number system, radicals, second degree equations, graphing of advanced functions and application problems are discussed.

ALGEBRA , PART 2**GRADES 10-11**

This course is for those students who have completed Algebra 1. The material covered in this course is that which is normally covered during the second semester of Algebra 2. Upon completing this course, the students will be able to take Algebra 3.

ADVANCED TRIGONOMETRY/ADVANCED CALCULUS**GRADE 12**

This course must be taken concurrently with Advanced Pre-Calculus. Trigonometry is taught the first semester. Topics include right triangle trigonometry, circular functions, their graphs and inverses, trigonometric identities and triangle applications. The introduction to Calculus in the second semester is designed to prepare students for college Calculus. Limits, derivatives, integral and continuity are covered.

Pre-requisites: Advanced Algebra 3 and/or approval of Department Chairperson.

TRIGONOMETRY/PRE-CALCULUS**GRADE 12**

Trigonometric functions, graphs, circular functions and triangle applications are covered in the first semester of this course. Material in the second semester is intended as a final preparation for college mathematics. Topics include complex numbers, functions, logarithms, and sequence and series.

Pre-requisites: Algebra 3 and/or approval of Department Chairperson

TRIGONOMETRY**GRADE 11-12**

In this semester course, the material covered is the same as that covered in the first semester of Trigonometry/Pre-Calculus. This course is for students who do not have the Pre-requisite to take Pre-Calculus.

ADVANCED PRE-CALCULUS**GRADES 11-12**

This course is to be taken prior to Advanced Placement Calculus or concurrently with Advanced Trigonometry/Advanced Calculus. It is intended to prepare the student for the study of calculus. Topics include polynomials and polynomial functions, conics, exponential and logarithmic functions, and an introduction to selected topics of calculus including limits and derivatives. There will be significant emphasis on graphs of functions and the use of the graphing calculator. Although there will be some extensions of topics introduced in the prerequisite advanced algebra course, this course is not an algebra course, and a student will need a sound understanding of basic algebra concepts if he/she registers for the course. The course is a "dual credit" course developed in conjunction with Alvernia University and is worth 3 college credits if the students meets the necessary criteria.

Pre-requisite: Advanced Algebra 3 with approval of Department Chairperson.

ADVANCED PLACEMENT CALCULUS**GRADE 12**

This course is for students who have completed both a Pre-Calculus and a Trigonometry course. College level material is presented. Topics include limits, continuity, differentiation, integration, and applications. Students will have the opportunity to take the Advanced Placement Test in the spring by which they may obtain college credit for their work.

Pre-requisite: Approval of Department Chairperson.

Please Note: Students enrolled in AP classes are required to take the AP test in the spring.

STATISTICS & PROBABILITY**GRADE 11-12**

This course is a one semester elective mathematics course offered to Juniors and Seniors. The course will provide an introduction to statistics and probability. The topics to be discussed are distribution of sample data, graphical applications, numerical methods for analyzing data, permutations, combinations, rules of probability and various probability distributions.

Pre-requisite: Approval of Department Chairperson.

COMPUTER DEPARTMENT

<u>NUMBER</u>	<u>COURSE NAME</u>	<u>LEVEL</u>	<u>CREDITS</u>	<u>GRADE</u>
391	Programming in Basic	3	1	11-12
394	C++ Programming	3	1	11-12

COURSE DESCRIPTIONS

PROGRAMMING IN BASIC

GRADES 11-12

In this course the student will learn to use the computer as a tool to meet their needs. The course will include topics such as input, read data, graphing, arrays, subroutines, peeks, pokes, searching and sorting, and other advanced topics. The student will write programs to be used as tutorials as well as programs for their own enjoyment. Visual Basic will be used.

C++ PROGRAMMING

GRADE 11-12

In this course, the student will study computer science. The student will study the basic elements of computer systems, ethical use of the computer, applications of computing, program specification, design, coding, and documentation, data structures, and searching and sorting routines. A structured approach to programming will be learned through the use of the C++ language. This course is a college entrance level course. Visual C++ will be used.

IST 110: INFORMATION, PEOPLE AND TECHNOLOGY

GRADE 11-12

The use, analysis and design of information systems and technologies to organize, coordinate, and inform human enterprises. IST 110 Introduction to Information, People and Technology (3) (GS) Information, People and Technology presents the high points of an education in the College of Information Sciences and Technology. It opens an intellectual journey through the ideas and challenges that IT professionals face in the world. It will address major questions such as: How can we use technology to organize and integrate human enterprises? How can technology help people and organizations adapt rapidly and creatively? What can we do about information overload? Three perspectives (or facets) address the core issues: information or the basic science of data encoding, transmission and storage; people or the interactions among technologies, institutions, regulations and users; and technology or the design and operation of basic information technology devices. Students completing the course will be confident users and consumers of information technology. Students will develop research and analytical skills to evaluate specific devices and understand how those devices function in larger socio-technical systems. Students will be able to predict and anticipate the impact of new technologies on human institutions as well as understand the potential impact of institutions on the use and design of information technologies. The course employs an action-oriented approach. Students learn by doing—formulating and solving problems drawn from professional contexts, detecting and recovering from errors related to technology use, and locating, reading and studying materials that support their analysis and problem-solving. Students will accomplish this by participating in team-based learning. The course provides students with the opportunity to use, modify, and evaluate software to search for, frame, and express ideas with fluency. A variety of mechanisms are used to assess student performance. These evaluation methods typically include exams, quizzes, homework assignments, group projects, and peer and self-assessments. IST 110 is the introductory course in IST, and, as such, serves as a prerequisite for 200-level (intermediate) IST courses. It is a required course for all majors and minors in IST, and meets requirements for a General Education or Bachelor of Arts Social Science (GS) course. The course is delivered with significant student interaction with technology. At University Park, it is offered in multiple sections (typically 40-60 students per section), in the Fall and Spring semesters. At other Penn State campuses, it would be offered in class sizes typically ranging between 20-50 students.

SSCIENCE DEPARTMENT

<u>NUMBER</u>	<u>COURSE NAME</u>	<u>LEVEL</u>	<u>CREDITS</u>	<u>GRADE</u>
411	Advanced Physical Science	3	1	9
412	Physical Science	2	1	9
413	General Physical Science	1	1	9

COURSE DESCRIPTIONS

The primary goal of the Science Department is to support the school's mission statement in meeting and enriching the life needs of its individual students to meet all of life's challenges. To help our students successfully meet all of life's challenges, the science department strives toward helping students to develop effective communication skills, develop skills of analytical and critical thinking, develop problem-solving skills, use technology resourcefully and effectively, work in cooperative groups, become independent self-directed learners and become scientifically literate.

ADVANCED PHYSICAL SCIENCE

GRADE 9

This course serves as an introduction to chemistry and physics. It is intended for those students that need the highest academic challenge, are proficient in math and writing and have an interest in pursuing a science-related career. Students will study scientific principles and learn scientific reasoning through discovery and inquiry. The course includes a variety of hands-on laboratory exercises and demonstrations as students progress through the year of in-depth study of matter and energy that will be the foundation for follow-up science courses. The course is recommended for those students who are college-bound with interest in careers of health or natural sciences.

Pre-requisite: Approval of Department Chairperson

PHYSICAL SCIENCE

GRADE 9

This course serves as an introduction to chemistry and physics. Students will study scientific principles and learn scientific reasoning through discovery and inquiry. The course includes a variety of hands-on laboratory exercises and demonstrations as students progress through a year of study of matter and energy that will serve as a foundation for follow-up courses. Students will gain a working knowledge of the metric system and develop their skills in writing and mathematical problem solving. The course is recommended for students who may be college-bound but choose not to pursue a career in health and natural sciences.

GENERAL PHYSICAL SCIENCE

GRADE 9

This course provides basic introduction to chemistry and physics. The course includes a variety of hands-on laboratory exercises and demonstrations as students progress through a year of study of matter and energy similar to topics covered in the physical science course, but at a level more suited to the students' ability level. Students will gain knowledge of standards of measurement and continue to develop skills in writing and mathematical problem solving. The course will also provide the student with applicable careers, global connections, and practical applications in a technological society.

ADVANCED BIOLOGY

GRADE 10

Advanced Biology is a college preparatory course designed for students planning on majoring in a natural or health related sciences in college. The course has a lecture and a lab component that provides the student with a rigorous curriculum that places emphasis on topics in biochemistry, cell and molecular biology, heredity and genetics, plant structure and function, animal structure and function, ecology, and evolutionary biology. This laboratory-oriented course utilizes college level materials and offers units of study in experimental design. The student will be required to do supplemental readings, engage in class discussions and complete both individual and group projects. This course is highly recommended for those who intend to take Advanced Placement Biology.

Pre-requisite: Approval from the science department chairperson or current science teacher.

BIOLOGY

GRADE 10

Biology is a college preparatory course that is designed students who are not planning on pursuing a career in the natural or health sciences. The curriculum provides the student with solid foundation of many biological principles. Emphasis will be placed on biological concepts in biochemistry, cellular and molecular biology, genetics, evolution, ecology and a systematic approach to organisms. The student will be required to participate in individual and group projects, laboratory exercises and class discussions that are designed to further build the student's language of science.

Pre-requisite: Approval from the science department chairperson or current science teacher.

GENERAL BIOLOGY

GRADE 10-11

This is an introductory Biology course that is designed to provide the students with a survey of Biological principles that are rooted in everyday life experiences. The course involves class discussion, hands-on activities and labs that will introduce the student to essential topics of biology while keeping the language of science as informal and simple as possible.

Pre-requisite: Approval from the science department chairperson or current science teacher.

ADVANCED CHEMISTRY

GRADE 11

This course will help students understand key components of chemistry. Students will review and reinforce basic concepts, explore practical applications in chemistry, learn and practice safe laboratory techniques and procedures, and apply problem-solving and mathematical skills in preparation for college level chemistry courses.

Pre-requisite: Approval from the science department chairperson or current science teacher.

CHEMISTRY**GRADE 11**

This course will help students understand key components of chemistry. Students will review and reinforce basic concepts, explore practical applications in chemistry, learn and practice safe laboratory techniques and procedures, and apply problem-solving and mathematical skills in preparation for college level chemistry courses.

Pre-requisite: Approval from the science department chairperson or current science teacher.

GENERAL CHEMISTRY**GRADES 10-11-12**

This course will help students understand key components of chemistry. Students will review and reinforce basic concepts, explore practical applications in chemistry, learn and practice safe laboratory techniques and procedures, and apply problem-solving and mathematical skills. This course will also provide the student with applicable careers, global connections, and practical applications in a technological society.

Pre-requisite: Approval from the science department chairperson or current science teacher.

ADVANCED PHYSICS**GRADE 12**

This course is designed to provide a strong basis for students who intend to take further science courses in college, especially those interested in majoring in science of the fields of engineering or medicine. Topics studied will include vector and scalar quantities, straight line motion and motion in a plane, forces, work, energy and momentum, light (considered as part of the electromagnetic spectrum) and sound; magnetism and electricity; and modern physics. This course is a "Dual Credit" course developed in conjunction with Alvernia University. The course is worth 4 college credits if the student meets the necessary criteria. This is a laboratory course.

Pre-requisite: It is recommended that the student has taken and passed Algebra 3 with an 85% or higher
Approval from the science department chairperson or current science teacher.

PHYSICS**GRADE 12**

This course is designed to present a solid basis in classical physics. Topics studied will include vector and scalar quantities, straight line motion and motion in a plane, forces, work, energy and momentum; light (considered as part of the electromagnetic spectrum) and sound; magnetism and electricity; and modern physics. Mathematical applications will be stressed where appropriate, but emphasis will also be placed on practical applications of physics to daily living. Students are required to submit an independent laboratory project or term paper each semester.

Pre-requisite: Approval of Department Chairperson or Junior Science Teacher

ADVANCED ANATOMY AND PHYSIOLOGY**GRADES 11-12**

This lab-based science elective is designed primarily for students who are interested in college preparation for majors in biology or health-related careers. The rigorous college curriculum is designed to provide the student with a detailed study of the structure and function of the human body systems and their coordination in maintaining homeostasis. Dissection of several vertebrate organisms and vertebrate organs will occur. This course is a "Dual Credit" course developed in conjunction with Alvernia University. The course is worth 4 college credits if the student meets the necessary criteria.

Pre-requisite: A strong background in biology and chemistry is highly recommended.
Approval from the science department chairperson or current science teacher

ENVIRONMENTAL SCIENCE**GRADES 11-12**

A lab-based science elective that enables students to develop an understanding of natural and man-made environments and environmental problems the world faces. Emphasis will be placed on Earth's systems and resources, humans and the environment, pollution and waste production, energy use and global change, and civic responsibility toward sustainability.

ECOLOGY**GRADES 11-12**

A lab-based science elective that helps students understand the relationships between organisms and organisms in their environment. Emphasis will be placed on the composition, structure, function and distribution of populations, communities, and ecosystems. Students will also learn about biodiversity and conservation as they study selected groups of flora and fauna found in Pennsylvania.

ADVANCED PLACEMENT BIOLOGY**GRADES 11-12**

AP Biology is a rigorous and demanding course, which is the equivalent of an introductory college biology course. Content will be covered in more depth and greater expectations will be placed on interpretation and analysis of information than previous biology courses. In addition, statistical analysis of data and modeling of concepts will be expected. A significant amount of learning must be completed at home to allow time for discussions, labs, and inquiry during scheduled class time. AP Biology will develop students' analytical and critical thinking skills, technical writing skills, and scientific literacy to prepare them for college science curriculum and the AP Biology exam. The AP Biology curriculum encompasses 4 "big Ideas", with essential knowledge and process skills that support each other. These "Big Ideas" include: Big Idea 1: Evolution - the process of evolution drives the diversity and unity of life; Big Idea 2: Cellular Process (Energy and Communications) - Biological systems utilize free energy and molecular building blocks to grow; Big Idea 3: Genetics and Information Transfer - living systems store, retrieve, transmit, and respond to information essential to life processes; Big Idea 4: Interactions - Biological systems interact and these systems and their interactions possess complex properties.

Pre-requisite: Students should have taken and passed the following courses with the average indicated or higher: advanced biology (85%) or biology (91%). Students should have taken algebra 3 and chemistry or be taking these classes concurrently with AP Biology.

Approval of Department Chairperson or current Science Teacher

ANIMAL BEHAVIOR**GRADES 11-12**

In this science elective course, students will explore how scientists study animal behavior and how behavior is shaped by the evolutionary forces of natural and sexual selection. Topics include: conflict, cues, signals and communication, parental care and social behavior and the role of genes, environments and learning in regulating behavioral diversity.

RESEARCH TOPICS IN S.T.E.M.**GRADES 10-12**

An elective course offered to students who are interested in conducting independent research on a topic of interest in science, technology, engineering, and mathematics. The student will be required to follow the scientific method, submit a research paper or poster project, and present their research to a panel of faculty judges. The final research project may be submitted in local and state level competitions at student's request and advising teacher's approval.

Pre-requisite: The student must consult their advising teacher in the area of interest for approval

FOREIGN LANGUAGE DEPARTMENT

NUMBER	COURSE NAME	LEVEL	CREDITS	GRADE
510	French 1	2	1	9-11
511	French 2	2	1	10-12
512	Advanced French Cycle 1.1	3	.5	11-12
513	Advanced French Cycle 1.2	3	.5	11-12
514	Advanced French Cycle 2.1	3	.5	11-12
515	Advanced French Cycle 2.2	3	.5	11-12
520	Spanish 1	2	1	9-11
521	Spanish 2	2	1	10-12
522	Advanced Spanish 3	3	1	11-12
523	Advanced Spanish 4	3	1	12

COURSE DESCRIPTIONS

FRENCH 1

GRADES 9-11

This is an introductory course to the French language and culture. Students learn the basics of all four language skills: listening, speaking, reading, and writing through a carefully ordered presentation of dialogues, vocabulary, grammar, and reading exercises. A cross-cultural perspective is encouraged by the introduction of everyday elements of French civilization.

FRENCH 2

GRADES 10-12

This course is the continuation of the four-fold aim of listening, speaking, reading, and writing with a more in-depth treatment of grammar. At various intervals there is some further treatment of French civilization.

ADVANCED FRENCH CYCLE 1 AND 2

GRADES 11-12

The Advanced French program is an in-depth study of the language, culture, and civilization of France and the French-speaking world. The program is designed as complementary semester courses; students are encouraged to pursue all four semesters. Mastery and proficiency of the French language will be developed by using the target language exclusively in most lectures, discussions, reading selections, and writing assignments.

Pre-requisite: 80 in French 2 and the teacher's signature.

CYCLE 1: First Semester: TWENTIETH CENTURY FRENCH LITERATURE

This course is a survey of contemporary French Literature as exemplified in the poetry, prose, and films of the 20th century. Le Petit Prince by Antoine de Saint-Exupery, a full length French film classic and selected contemporary poetry will be studied in depth.

Second Semester: A HISTORY OF FRANCE AND ITS PEOPLE

The purpose of this course is to present a chronological overview of the complete history of France from the Gallo-Roman period to the 20th century. French achievements in literature, the arts, and the sciences will be studied.

CYCLE 2: First Semester: NINETEENTH CENTURY FRENCH LITERATURE

This course is a survey of French literature during the Romantic and Naturalist Periods, with emphasis on the emergence of the "popular novel" and the "short story". Le Comte de Monte Cristo by Alexandre Dumas and selected short stories by Guy de Maupassant will be studied in depth.

Second Semester: FRANCE IN THE WORLD TODAY

This course is an overview of France and the Francophone nations in the world today in terms of geography, government, political divisions (former Provinces and their traditions and modern Departments), education, agriculture, industry, and contemporary daily life. Paris and its surroundings are studied in depth.

SPANISH 1

GRADES 9-11

This is an introductory course to the Spanish language and culture. Students learn the basics of listening, speaking, and translation. The main emphasis is on conversational Spanish. Four objectives must be covered in each class to realize this objective: vocabulary, conversation, grammar, and translation. A cross cultural perspective is encouraged by the introduction of everyday elements of Spanish civilization.

SPANISH 2

GRADES 10-12

This course is a continuation of the basics learned in Spanish 1. The emphasis is on reading and Spanish grammar, but greater use of tenses and more linguistics is applied. An in-depth treatment of phrases and commonly used idiomatic expressions is taught. Extensive use of language in context is the basis of the course.

ADVANCED SPANISH 3

GRADES 11-12

This course continues the development of the basic language skills. Students continue verb study as well as a more in-depth study of grammar. Literature as it applies to Spanish civilization is introduced. Conversation and listening skills must be strong enough to comprehend the course, which is taught entirely in Spanish in the second semester.

Pre-requisite: Average of 80 in Spanish 2 and approval of teacher.

ADVANCED SPANISH 4

GRADE 12

This course offers an overall, in-depth study of idioms, conversation, literature, civilization and linguistics. A Spanish play or novel is read each semester and discussion as to how it relates to Spanish history. Notes are given and taken in Spanish. Class discussions on topics of current interest will be conducted in Spanish.

Pre-requisite: Average of 80 in Advanced Spanish 3 and approval of teacher.

BUSINESS DEPARTMENT

NUMBER	COURSE NAME	LEVEL	CREDITS	GRADE
610	Introduction to Word Processing	2	.25	9
620	Introduction to Microsoft Excel	2	.25	10
630	Accounting 1	2	1	11-12
631	Accounting 2	3	1	12
662	Sports and Entertainment Marketing	3	.5	11-12
663	Computer Applications	2	.5	11-12
670	Personal Law	2	.5	11-12
680	Business Law	2	.5	11-12

COURSE DESCRIPTIONS

INTRODUCTION TO WORD PROCESSING

GRADE 9

This course is designed to enable students to use Microsoft Word 2010 to create, format, and edit documents such as letters, memos, manuscripts, reports with MLA formatting. They will learn to save documents and to print the documents they create.

INTRODUCTION TO MICROSOFT EXCEL

GRADE 10

This course is designed to enable students to use Microsoft's spreadsheet program, Excel. Students will learn to organize and calculate data, track financial data, and create charts and graphs.

ACCOUNTING 1

GRADES 11-12

This course is for the student who has the desire to use it for a career in accounting after high school; to acquire the knowledge needed for a career in related business fields; to study business and accounting at the college level. The accounting cycle for businesses organized as a proprietorship and partnership will be discussed in detail. The course offers an introduction to accounting theory and methods, debits and credits, and the use of various journals, ledgers and other accounting records.

ACCOUNTING 2

GRADE 12

This course is an Advanced level course that continues the accounting cycle with corporations. This course will develop accounting expertise and allow the students to market their skills on the job or at college. Emphasis is placed on the use of special journals and ledgers.

COMPUTER APPLICATIONS

GRADES 11-12

This is a semester course which will further explore Microsoft Excel 2010 to gain complete knowledge of the software, learning how to keep business and personal records organized. Students will also learn Power point 2010 and be able to create presentations for classroom use. This course is valuable for all college bound students.

SPORTS AND ENTERTAINMENT MARKETING

GRADES 11-12

This is a college prep course that will examine the complex and diverse nature of sports and entertainment marketing from a strategic marketing perspective. Specific emphasis will be placed on the contingency framework for strategic sports and entertainment marketing, with attention to market selection, marketing mix decisions, and implementation and control of the strategic sports and entertainment marketing process. Additionally students will "develop" products, while going through all steps used in taking the products to market.. Other areas explored will include endorsements, licensing, and product life cycle.

PERSONAL LAW

GRADES 11-12

The course deals with concepts that relate to practical issues in one's everyday life. After a general overview of the development of our legal system and how ethics impacts it, the student will develop a sound understanding of the fundamental concepts of civil and criminal law, court, procedures, juvenile law, marriage, landlord and tenant and estate law. The student will also gain insight into the structure and operation of the federal, state, and local legal systems as well as the function of the state court system.

BUSINESS LAW

GRADES 11-12

This course teaches law in its application to business situations and business issues we encounter as a part of our daily lives. It presents the rights as well as the duties assumed by those who take part in daily legal transactions. Topics covered will deal with ethics, contract law, the law of sales, warranties, bailments, employment and agency.

ART AND MUSIC DEPARTMENTS

NUMBER	COURSE NAME	LEVEL	CREDITS	GRADE
702	Art 1.1	2	.5	11-12
703	Art 1.2	2	.5	11-12
704	Art 2.1	2	.5	12
705	Art 2.2	2	.5	12
715	Music Appreciation	2	.25	10
720	Band	0	1	9-12
725	Chorus	0	1	9-12
726	Music Theory	2	.5	11-12

COURSE DESCRIPTIONS

ART 1.1 and 1.2

GRADES 11-12

These semester courses present a diverse program for beginners. It combines developing basic skills as well as creative thinking. There are 2-dimensional experiences with pencil, pen and ink, charcoal, tempera and acrylic paints, and various printmaking techniques. Also, some 3-dimensional experiences such as sand casting will be offered.

ART 2.1 and 2.2

GRADE 12

These semester courses build on the skills learned in Art 1.1 and/or 1.2. There are more challenging projects to stimulate imagination and an exploration of new media, such as ,calligraphy, scratchboard, sculpting, wood-burning and a variety of mixed media including collage.

Pre-requisite: Approval of Art teacher.

[The above courses will be offered based on the availability of a teacher.]

MUSIC APPRECIATION

GRADE 10

This nine week survey course will provide students with an introduction, background and basic foundation to the study of the humanities. The course will be devoted to a focus of what the humanities are and will provide students with the primary background in each of the disciplines. musical interpretation.

BAND

GRADES 9-12

Membership in the band is an opportunity to explore and enjoy music through participation in a number of musical experiences ranging from small ensembles to full concert and marching band. Through these experiences we enhance our knowledge of classical as well as contemporary music.

CHORUS

GRADES 9-12

Membership in the Chorus is an opportunity to explore and enjoy music through participation in various musical experiences which will include Diocesan events, concerts and performances.

MUSIC THEORY

GRADES 11-12

This course is an introduction to the theoretical basis of music. Emphasis will be placed on melodic, rhythmic, and harmonic elements of music through in-depth study and analysis of musical examples. Students must have the ability to read music.

Pre-requisite: Approval of Music teacher.

[The above course will be offered based on the availability of a teacher.]

HEALTH and PHYSICAL EDUCATION DEPARTMENTS

<u>NUMBER</u>	<u>COURSE NAME</u>	<u>LEVEL</u>	<u>CREDITS</u>	<u>GRADE</u>
800	Health 1	2	.25	9
801	Health 2	2	.25	11
810	Physical Education 1	2	.25	9
820	Physical Education 2	2	.25	10
830	Physical Education 3	2	.25	11
840	Physical Education 4	2	.25	12
850	Physical Fitness	2	.25	12
860	First Aid	2	.25	11-12

COURSE DESCRIPTIONS

HEALTH 1

GRADE 9

This is a first level course designed to discuss the major body systems with an emphasis on how development occurs. Topics to be discussed will include major body systems, physical fitness, hygiene, nutrition, personal health care, smoking/vaping, and drugs and alcohol.

HEALTH 2

GRADE 11

This is a second level course designed to discuss the major body systems with an emphasis on maintenance of the body and prevention of illness. Topics to be discussed will include heart disease, managing stress, cancer, diabetes, arthritis, digestive disorders, aids, and first aid.

PHYSICAL EDUCATION

GRADES 9-12

The physical education program uses focus interval training. This program will provide lifetime fitness and knowledge. The evaluation process will be based upon pre-testing and post-testing showing the improvement made by the end of the course. This course will also teach students fundamental skills of team sports.

PHYSICAL FITNESS

GRADE 12

This course is designed to promote muscular strength, endurance, flexibility, enhancement/growth of muscle and the total physical fitness of the body. The course will provide knowledge of the weight room, weight room etiquette, safety and how to perform core lifts while creating a logbook.

FIRST AID

GRADE 11-12

Students will learn emergency first aid procedures for treatment and prevention of injuries. This will enable students to take appropriate steps to help keep a victim alive or help keep injuries from becoming worse until professional help arrives. This course will act as a foundation for First Aid and CPR certification .

VOCATIONAL - TECHNICAL PROGRAM

The time shared vocational-technical program is scheduled in collaboration with the area Vocational-Technical Schools. Students in grades 10, 11, or 12 may apply. We recognize that some high school students have special aptitudes for vocational and technical subjects which cannot be adequately provided for in the ordinary high school program; therefore, we allow students to choose these subjects which are offered at the neighboring technical schools. Students who select this program will attend Nativity B.V.M. High School for one semester and the Vocational-Technical School for one semester. Students will receive the appropriate credits for each semester that they attend the technical school. Vo-Tech students are on a special schedule to be set up individually. Any student in Vo-Tech must select Independent Vo-Tech English to earn the required English credits. Any student interested in attending Vo-Tech must inform the Guidance Office, in writing, no later than September of the Sophomore Year.

NATIONAL HONOR SOCIETY ACADEMIC ELIGIBILITY

Students become academically eligible to be nominated for the St. Thomas Aquinas Chapter of the National Honor Society of Nativity B.V.M. High School by meeting the following academic requirements:

Grades 12, 11 and 10:

1. Must have at least a 3.5 GPA in Cumulative Class Rank as a final GPA in the previous year.
2. Must have at least a 3.5 GPA in Current Class Rank as of the 1st Quarter in the current year.

Students new to Nativity B.V.M. High School

Grade 12 and 11:

Must have at least a 3.7 GPA or above in the Current Class Rank as of the 1st quarter in the current year. The transfer student must have attended Nativity for at least 1 semester before being eligible and also have a letter of recommendation from the principal of his/her previous school stating that he/she is qualified to be considered as a member of Nativity of the Blessed Virgin Mary High School Chapter of the National Honor Society.

VIRTUAL HIGH SCHOOL

Several students will have the opportunity to participate in a cutting-edge instructional program, Virtual High School. More and more colleges are offering this self-paced instruction as a way to earn a degree, especially at the graduate level.

The Virtual High School is an exciting initiative that allows a student tremendous flexibility to take on online class. VHS offers over 200 exciting courses to students interested to expanding their experiences to classes not normally offered in the high school.

Some of the courses offered are for college credit, (there is a cost involved for these credits), and most of the Advanced Placement courses are offered. (All AP fees apply and students who enroll in any AP class are required to take the AP exam.) Students taking an AP course will need to pay a fee of seventy five dollars (\$75) that is required by the VHS program. Also some classes have a lab kit associated with the course and must be purchased by the student.

VHS also offers many standard level high school courses that enhance the program that Nativity can offer only through this opportunity. Only courses that are not normally offered at Nativity BVM High School will be open for enrollment. Students take their classes from an accredited and credentialed instructor. They will join a class of approximately 25 students, potentially from around the world, by logging on and taking the course when it is most convenient to the student. A regular class period will be set aside during the school day for the students to work on their lessons, however, work will be required on the computer outside of class and a broadband INTERNET connection is needed.

The course work is intense. Students need to be **highly motivated**, self starters, and must be able to work well on their own. The 12-week sessions require approximately 10 hours of work a week to stay up with the class.

Students are required to have the approval of the Director of Studies and also the VHS Site Coordinator for the course. Once classes begin, students will not be allowed to drop a VHS course. Grades are assigned by the VHS instructor and not teachers at Nativity BVM High School. The grades assigned will be part of the student's grade point average. Nativity's grading policy will be in effect for these classes. Students may take a maximum of one VHS class per semester. For more information, interested students and their parents are urged to investigate the program further by logging on to the VHS website: www.govhs.org.
